

Markup languages

Philipp Fruck & Pius Walter

Markdown

```
# This is a heading
```

The amount of # increases or decreases the size of the heading

```
## This is a smaller heading
```

```
- Lists start with a '-'
```

```
  - And they can be indented
```

```
* You can also start them with '*'
```

```
1. Numbered lists start with digits
```

```
2. You don't even have to sort them yourself!
```

```
2. Except when your markdown is noncompliant, such as this presentation ;)
```

■ This is a heading

The amount of # increases or decreases the size of the heading

Typst

`$f(x) = x + 1$`

$$f(x) = x + 1$$

LaTeX

```
\[ \sum_{n=1}^{\infty} 2^{-n} = 1 \]
```

$$\sum_{n=1}^{\infty} 2^{-n} = 1$$
